Pune, India | [7507186684](https://www.linkedin.com/in/kashinathkesale1) | kashinathkesale1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Profile

Engineering graduate focused on backend engineering, with software engineering experience delivering SaaS features. Strong foundation in DSA and core CS fundamentals with hands-on experience building reliable, scalable backend systems.

Experience

Software Engineering Intern GoBasera Oct 2025 - Dec 2025

- Contributed to the **Community Onboarding Wizard**, implementing backend APIs to capture and persist **housing society details** during signup and support the **multi-step onboarding workflow**.
- Reduced **Docker Compose setup time from 1+ hour to under 30 minutes** by fixing **health-check timing and startup configuration**.

Web Developer Electro Infinity Club Jun 2025 - Sep 2025

- Optimized the official club website using **React.js**, improving page performance and cross-device accessibility.
- Implemented UI and performance improvements that **increased event registrations by approximately 40%** across club events.

Projects

PayFlowX - Transactional Payment System (*NestJS, TypeScript, PostgreSQL, Redis*) [GitHub](#) Feb 2026

- Built a **transactional payment engine** with **database-level idempotency** and **ACID-compliant operations** to ensure safe retries and prevent duplicate charges.
- Designed an **asynchronous settlement workflow** with a **one-to-one Payment–Settlement model** and implemented a **reconciliation module** to audit ledger consistency.
- Optimized read performance using **Redis cache-aside caching**, added **distributed rate limiting**, and implemented **Redis distributed locks** to prevent concurrent duplicate payment processing.

Fleet Monitor (*NestJS, TypeScript, Socket.IO, React*) [GitHub](#) Sept 2026

- Built a **real-time fleet monitoring platform** that ingests robot coordinates, battery, and status telemetry and streams **live state updates** to a React dashboard using Socket.IO.
- Implemented **sequence-based ordering and heartbeat timeouts** to reject delayed/out-of-order telemetry, detect stale robots, and tested the system with **up to 500 simulated robots** across **250ms–2000ms update intervals**.

Technical Skills

Problem Solving: Solved **600+** LeetCode problems; active in weekly contests

Programming Languages: Java, JavaScript, TypeScript, Python

Backend & Full-Stack: Node.js, NestJS, Express.js, React.js, Next.js, REST APIs

Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis

Computer Science Fundamentals: Object-Oriented Programming (OOP), DSA, DBMS, OS, Computer Networks

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code

Education

Wadia College of Engineering Pune Pune, India
Bachelor of Engineering - Electronics & Telecommunication Engineering 2022 – 2026

Certifications & Activities

Networking Basics & Operating Systems - Cisco Networking Academy
National Service Scheme (NSS) Volunteer 2023 – 2025
